

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

V. *Part of a Letter from the Reverend Mr. Samuel Carte, Rector of St. Margaret's Parish in Leicester, to Mr. Humfrey Wanley, F. R. S. Concerning an Ancient Tessellated, or Mosaic Work, at Leicester.*

S I R,

**I** Take this Opportunity to send you a draught, made by one *Benjamin Garland*, of the *Opus Tessellatum*, still extant in a Cellar here, over against the Elm Trees, near *All-Saints Church*. It is generally called *Actæon*, by such Authors as mention it; but the bare Inspection of it will convince you, that it is a Representation of the Fable, which says, that a Person having found fault with *Venus*, she, to be revenged of him, engaged her Son *Cupid* to make him fall in Love with a Monster.

It was first discovered about 40 Years ago, upon digging of the Cellar, at about a Yard and half under the common present Surface of the Earth. What extent the whole Pavement was of is not known; but this Figure, which, by order of the Master of the House, was preserved, is an *Octogon*, surrounded by a List, as you see in part represented in the corners of the Picture herewith sent you. Without this, tho' not here represented, is a Twist or Wreath of various Colours; and round that, is a second List like the former. These two Lists, with the Wreath between them, are 6 Inches and a  $\frac{1}{4}$  broad. The downright and transverse Diameters of the *Area* are just a Yard; but the others, leading from corner to corner, are a Yard and two Inches and an half. The Man, from Head to Foot, is two Foot and  $4\frac{1}{2}$  Inches. *Cupid*  
seems

See the Figure.

seems to be two Foot ; but his Feet, as well as the bottom of the Monster, are spoiled, the *Tessella* representing them being gone. You will easily understand, that the whole *Area* of the Figure, which is here left blank, ought to be fill'd up with white *Tessella*, in like manner as you see some Intervals of the Figures here. I hope, that what foregoes, will serve to give you a just Idea of this Piece of Antiquity, but forbear to make any Reflections on it, as knowing that your Genius and Studies qualify you for that much better than my self. I am,

Sir,

Leicester,  
August 7. 1710.

Your Affectionate Friend

and humble Servant,

SAMUEL CARTE.

VI. *An Account of the Repetition of an Experiment of the late Dr. Hooke's, concerning two Liquors, which, when mixt together, will possess less space, than when separate : With another Experiment confirming the same. By Mr. F. Hauksbee, F. R. S.*

THE Experiment related by the late Ingenious Experimentor Dr. Hooke, in one of his Papers (delivered to me by Mr. Waller) is concerning two Liquors, which, when mixt together, would possess less space than when separate ; which he calls a Penetration of Dimensions : And adds further, that this Penetration is the cause of Heat, of Fire, of Flame, of the Power of Heat,
